WPL HiPAF sewage treatment plant – FRANCE

The recently installed **HiPAF** plant shown with accompanying kiosk which houses the Air Blower and Control Panel.

Interior of the HiPAF plant in operation showing the aerated biozone sections.

WPL have recently supplied a **HiPAF** sewage treatment plant serving the workforce at a factory in South West France. The **HiPAF** was designed for the 25 population equivalent machine shop employees and utilises a robust fixed film/culture fixes biological process that provides excellent treatment of waste water with minimum maintenance requirements. These features combined with an quick and easy installation provide a low cost and very effective wastewater treatment solution for the customer.

The **HiPAF** plant was supplied to the company IDG, 33370 Antigues, who were carrying out the construction and renovation work on behalf of a specialist machined gear manufacturer at their factory site:
